

AQUALINE
MARINE LIMITED

CANTERBURY WIDEBEAM

SPECIFICATION

Aqualine's hand-crafted boats offer bespoke-level design and finish at an affordable price, backed by a reassuring after-sales support service.

All boats conform to the Recreational Craft Directive and come complete with CE mark plus a full 12 month warranty, and extended warranties on many parts. A full owner's manual with operating instructions and technical information is also provided.

The renowned Aqualine quality is once again evident in the Canterbury widebeam boat. A truly luxurious craft with an impressive level of equipment as standard, this boat offers exceptional value for money. The real attraction lies in the modular design which allows the layout to be altered to completely satisfy your requirements. There are also plenty of opportunities to customise your boat and you can choose the length, up to 70ft and beam up to 12 ft.

TECHNICAL

Engines

All the boats come with a 4 cylinder 2190cc Barrus Yanmar Shire 50hp diesel engine with PRM 150 hydraulic gearbox, one 50 amp and one 240 amp alternator. Standard control panel.

Depending on length/beam and/or usage we do recommend choosing a bigger engine.

Barrus Yanmar Shire 70hp, 4 cylinder 3319cc engine with a 50 and a 240 amp alternator. PRM 260 D2 hydraulic gearbox. Standard control panel. Upgraded control panel is available which features tachometer, oil pressure, voltmeter and water temperature gauges.

(All engines come installed, tested and running with one starter battery and a water lubricating stern tube).

Tanks

Water tank, approx. 170 gallons, fully baffled, stainless steel. Diesel Tank, approx. 95 gallons with drain off. Pressure tested. Black waste tank, 47 gallons. (Only available with a macerator pump out toilet).

Heating system

Diesel fired central heating system with timer which runs the Finrads and a heated towel rail in the bathroom, also provides hot water through a twin coil calorifier, with immersion. The calorifier is also connected to the engine cooling circuit meaning that the engine will heat the hot water.

240v power system

Power to 6 brushed stainless steel double sockets (plus a plastic socket concealed inside the TV unit) is supplied via a 240V system fitted as standard. Tested and installed to RCD standard for connecting to shore power when moored in a marina. When cruising, power is supplied from a Victron 1600 inverter with 70 amp charger, fitted as standard.

12v System

4 x 110 amp semi-traction domestic batteries, which are charged by a dedicated alternator. These are connected to a purpose-built distribution panel, and the system has circuit breakers for all of the appliances. The lighting is a combination of wall lights and LED down lighters throughout the boat. There is also under gunwale lighting in the corridor, and step lights at the bow and stern.

Bigger capacity and more robust batteries?

Upgrade to AGM batteries with a storage capacity of 600A/h (amp hours) which are designed to accommodate regular charging and discharging.

EXTERNAL

Steelwork

Shotblasted steelwork treated with an epoxy primer and two part polyurethane paint finish (except the hull which is blacked; blacking not suitable for salt/brackish water). Enhanced hull design built to CBA Code of Practice guidelines, with two full length rubbing strakes.

Hull blacking Upgrade

Have your hull prepared for cruising salt/brackish water. Also gives you, on average, a longer period between blacking.

Steel Plating	10mm/6mm/5mm/4mm	Rubbing strakes	Two full length (three at bow/stern)
Style	Cruiser	Handrails	T-section easygrip with scuppers for drainage
Decks	All self draining	Bow lockers	Fitted as standard
Weed Hatch	Quick release	Anodes	4 x 2.5kg magnesium anodes
Fender eyes	Brass Recessed (chrome available)	Stern doors	Steel, lockable
Gas Locker	To hold 2 x 13kg bottles (one provided)	Bow doors	Hardwood, glazed and lockable

EXTERNAL (con't)

Cruising pack

Front, rear and 6 side fenders, landline for connecting to shore power, mallet, 2 mooring pins, tiller and pin, windlass, lifebuoy, front and rear ropes, chimney and chinese hat, fire extinguisher, fire blanket, smoke and CO alarm.

Paint scheme

We offer a range of designs and paint combinations (2 colour paint and coachline as standard) using a two part polyurethane paint. All decks, roof and gunwales are treated to give a non-slip finish.

Add that extra touch of style and individuality

Make sure your boat is the envy of the waterways by adding an extra colour - choose an additional colour for the roof, handrails, counterbands and painted panels or maybe all three.

Window sizes

A mixture of portholes and windows (and a set of side doors) is used in the boat - refer to individual layout diagrams. Changes to window sizes can often be accommodated and we offer a choice between windows and portholes or a combination of both.

Anodes x 4

These are designed to sacrifice themselves before the hull of your boat and, along with the galvanic isolator, help protect the hull.

Bow lockers

Offer additional seating and handy storage for mooring pins, spare ropes and hose pipes.

Side doors

Allows extra light and ventilation to flood in as and when you choose.

INTERNAL

Layout

As per the individual diagram, but the modular design approach means that rooms can be re-arranged to have the bedroom at the bow rather than at the stern or to include a second bedroom, whilst the length can be extended in one foot increments up to 70 feet to extend existing rooms and to a maximum of 12 feet on the beam (wider on request).

Lining and wood type

All boats come with a choice of Ash or Oak. The roof in the standard craft is solid hardwood linear tongue and groove. The bedroom and bathroom have diagonal tongue and groove on the cabin sides. The remaining cabin area (galley, saloon) has a panelled effect, lined with deep hardwood trim. Full panelling or full tongue and groove also available.

Flooring

The bedroom area is carpeted (with underlay) and the bathroom floor is tiled, whilst the remainder of the boat has a solid 20mm hardwood flooring fitted over a plywood sub floor. Full hardwood, carpet or galley tiling available at no extra cost.

Interior finishes

We offer a choice of colours on soft furnishings, tiles, carpets (with underlay) and work surfaces as well as the exterior paintwork.

Bedroom

Fixed 5 ft bed with drawers under, overhead cupboards with down lights and a cupboard with drawer at either side. Full length wardrobes provide that all important hanging space.

Bedroom 2 (if required)

Bedroom 2 has a single berth and a workstation area to make this a practical, multi-use room. A second single bunk can be provided which also folds down in the daytime to make the bed into a sofa/seating area. Alternatively an extendable double bed can be fitted instead to make it a comfortable guest room. This bedroom can also be omitted giving more space in the saloon if preferred.

INTERNAL (con't)

Bathroom

An electric macerator (pump out) toilet, vanity unit with hand basin and full wall mirror with illuminated pelmet over. There is a shower wall, full-sized corner shower with a mixer unit. The shower is surrounded by a chrome quadrant screen. There is a heated towel rail, and shelving to provide further storage. A bath with shower over is available as an option, not to mention a choice of shower panel colours.

Galley

Either a Split or U-shaped galley is available, both with solid hardwood doors and granite worksurfaces. There is a full-sized stainless steel hob and double oven, integrated fridge and deep full size stainless steel sink with monobloc taps over. The use of 'magic corners' provides an ingenious solution to the problem of hard-to reach corners. Overhead cupboards and shelving provide further storage. Stainless steel extractor fan.

Saloon

Large saloon perfect for free standing furniture with a cast iron solid fuel stove. Depending on your layout there is a choice of various units to provide ample storage as well as to house the built-in 32" HD ready digital flat screen TV and DVD. There is also the opportunity to have a dining option included in the saloon, providing table and chairs for four, which is cleverly concealed under the gunwale when not in use.

TV cinema surround sound upgrade

Bring the movies to your boat with a multi purpose Blu-ray sound bar with a hidden sub woofer, 2.1 surround sound, USB connector for MP3 docking etc. and a built in radio. Perfect whatever the occasion.

Under gunwale lighting

Downlighting brings ambient and soft lighting in the bedroom and corridor.

Step lights - bow and stern

Safety and style combined.

OPTIONAL EXTRAS

DESCRIPTION	ONE BEDROOM	TWO BEDROOM
	57 X 10 FT from £119,950	57 X 10 FT from £122,950
