

AQUALINE

NARROWBEAM RANGE

SPECIFICATION

Aqualine's hand-crafted narrowboats offer bespoke-level design and finish at an affordable price, backed by a reassuring after-sales support service.

All boats conform to the Recreational Craft Directive and come complete with CE mark plus a full 12 month warranty, and extended warranties on many parts. A full owner's manual with operating instructions and technical information is also provided.

Choose from three layouts, the Manhattan, Monaco and Madison, which can all be personalised with a wide choice of finishes and optional extras. You can also choose your length up to 70ft to incorporate more rooms or give more space to existing rooms.

TECHNICAL

Engine

Beta Marine 38 engine: 4 cylinder 1498cc, 35hp engine with a 45 and a 175 amp alternator. Keel-cooled, indirect injection. PRM 120 mechanical gearbox. Standard control panel.

Choosing a boat 60 feet or over or plan on cruising rivers?

Upgrade: Beta Marine 43 engine: 4 cylinder 1999cc, 43hp engine with a 45 and a 175 amp alternator.

Keel cooled, Indirect Injection. PRM 150 hydraulic gearbox. Standard control panel. Upgraded control panel is available which features tachometer, oil pressure, voltmeter and water temperature gauges.

(All engines come installed, tested and running with one starter battery and a water lubricated stern tube).

Tanks

Water tank, approx. 110 gallons, fully baffled, stainless steel. Diesel Tank, approx. 55 gallons with drain off. Pressure tested. Black waste tank, 47 gallons. (Only available with a macerator pump out toilet).

Heating system

Diesel fired central heating system with timer which runs the 3 fitted radiators and a heated towel rail in the bathroom, also provides hot water through a twin coil calorifier, with immersion. The calorifier is also connected to the engine cooling circuit meaning that the engine will heat the hot water.

240v power system

Power to 4 brushed stainless steel double sockets (plus a plastic socket concealed inside the TV unit) is supplied via a 240V system fitted as standard. Tested and installed to RCD standard for connecting to shore power when moored in a marina. When cruising, power is supplied from a Victron 1200W Inverter with 50 amp charger. 3kW inverter with 120 amp charger is available as an upgrade.

12v System

4 x 110 amp semi-traction domestic batteries, which are charged by a dedicated alternator. These are connected to a purpose-built distribution panel, and the system has circuit breakers for all of the appliances. The lighting is a combination of wall lights and halogen down lighters throughout the boat. There is also under gunwale lighting in the corridor, and step lights at the bow and stern.

Bigger capacity and more robust batteries.

Upgrade to AGM batteries with a storage capacity of 600 AH (amp hours) which are designed to accommodate regular charging and discharging.

EXTERNAL

Steelwork

Enhanced hull design built to CBA Code of Practice guidelines, with two full-length rubbing strakes. The hull is blacked (blacking not suitable for salt/brackish water).

Hull blacking Upgrade

Have your hull prepared for cruising salt/brackish water. Also gives you, on average, a longer period between blacking.

Steel Plating	10mm/6mm/5mm/4mm	Rubbing strakes	Two full-length (three at bow/stern)
Style	Cruiser, Trad and Semi-Trad options	Handrails	T section easygrip with scuppers for drainage
Decks	All self draining	Bow lockers	Fitted as standard
Weed Hatch	Quick release	Anodes	4 x 2.5kg magnesium anodes
Fender eyes	Brass Recessed (chrome available)	Stern doors	Steel, lockable
Gas Locker	To hold 2 x 13kg bottles (one provided)	Bow doors	Hardwood, glazed and lockable

EXTERNAL (con't)

Cruising pack

Front, rear and 6 side fenders, landline for connecting to shore power, mallet, 2 mooring pins, tiller and pin, windlass, lifebuoy, front and rear ropes, chimney and chinese hat, fire extinguisher, fire blanket, smoke and CO alarm.

Paint scheme

We offer a range of designs and paint combinations (single colour paint and coachline as standard). All decks, roof and gunwales are finished with a non-slip surface.

Add that extra touch of style and individuality

Make sure your boat is pride of the waterways by adding an extra colour. Choose an additional colour for the roof, handrails, counterbands and painted panels or maybe all four.

Window sizes

A mixture of portholes and windows (and a set of side doors) is used in the boat - refer to individual layout diagrams. Changes to windows sizes can often be accommodated and we offer a choice between windows and portholes or a combination of both.

Anodes x 4

These are designed to sacrifice themselves before the hull of your boat and along with the galvanic isolator help protect the hull.

Bow lockers

Offer additional seating and handy storage for mooring pins, spare ropes and hose pipes.

Side doors

Allow extra light and ventilation to flood in as and when you choose.

INTERNAL

Layout

The Manhattan offers the conventional layout of bedroom at the stern and saloon at the bow, whilst the Monaco includes a cross bathroom allowing space for a utility area at the stern (with optional second loo). The Madison is a reverse layout with the galley at the stern and bedroom at the bow. Individual diagrams are shown in the brochure, but note that we can include extra length in order to add in additional rooms, (for instance a dinette cabin or second bedroom) or extend existing rooms to provide more space.

Lining and wood type

All boats come with a choice of Ash or Oak. The roof in the standard craft is solid hardwood linear tongue and groove. The bedroom and bathroom have diagonal tongue and groove on the cabin sides. The remaining cabin area (galley, saloon) has a panelled effect, lined with deep hardwood trim. Full panelling or full tongue and groove also available.

Flooring

The bedroom area is carpeted (with underlay) and the bathroom floor is tiled, whilst the remainder of the boat has a solid 20mm hardwood flooring fitted over a plywood sub floor. Full hardwood, carpet or galley tiling available at no extra cost.

Interior finishes

We offer a choice of colours on soft furnishings, tiles, carpets (with underlay) and work surfaces as well as the exterior paintwork.

Bedroom

Fixed double bed (option to have a Kingsize extending bed) with drawers under and overhead cupboard with down lights. Full length wardrobes. The Madison boasts an additional vanity unit.

Fancy extra sleeping space but don't want a bigger boat?

Why not fit a dinette in the saloon and have an extra two berth sleeping area for guests, or extend the length of the boat to incorporate a separate dinette cabin.

INTERNAL (con't)

Bathroom

An electric macerator (pump out) toilet, vanity unit with hand basin and full wall mirror with illuminated pelmet over. There is a full-sized corner shower with a mixer unit. The shower is surrounded by a hardwood glazed screen and door. There is a heated towel rail, and shelving to provide further storage. The Madison and Manhattan bathrooms are compartmentalised whilst the Monaco is a full-width walk through bathroom.

Galley

Split galley with solid hardwood units and worksurfaces. Upgrades available include granite worksurfaces, a breakfast bar or dinette. There is a full-sized stainless steel hob, oven and separate grill, integrated fridge and deep full size stainless steel sink with monobloc taps over. The use of 'magic corners' provides an ingenious solution to the problem of hard-to-reach corners. Overhead cupboards and shelving provides further storage. Monaco has a U-shaped galley.

Saloon

Large saloon designed for free standing furniture with a cast iron solid fuel stove. We fit a TV aerial and a unit with shelving, or why not upgrade to the TV/DVD option which fits discretely under the gunwale.

TV cinema surround sound upgrade

Bring the movies to your boat with a multi purpose Blu-ray sound bar with a hidden sub woofer, 2.1 surround sound, USB connector for MP3 docking etc. and a built in radio. Perfect whatever the occasion.

Utility/second loo

This utility area is fitted as standard on a Monaco design, which can be utilised for optional second loo. Using our bespoke length service you can of course incorporate this into the other designs.

Under gunwale lighting

Downlighting brings ambient and soft lighting in the bedroom and corridor.

Step lights - bow and stern

Safety and style combined.

OPTIONAL EXTRAS

DESCRIPTION	MANHATTAN	MONACO	MADISON
