## Engine

Canaline 38, 4 cylinder 1999cc engine with twin alternators - 50A and 80A, low noise Indirect Injection. PRM 120 mechanical gearbox. Engine control panel with tachometer which has an LED multi function display giving voltage, engine hours and warning lights for water, oil pressure & batteries. RCD emission compliant. 3 year warranty.

## Tanks

Stainless steel water tank 120 gallons (*approx*). Diesel Tank 40 gallons (*approx*). Pressure tested.

## Heating system

Diesel fired central heating system, with timer, running 3 radiators and a towel rail through a twin coil 13 gallon calorifier which is also connected to the engine cooling circuit meaning that the engine will heat the hot water. Additionally the saloon contains a Morso Squirrel solid fuel stove on a tiled hearth.

# Technical (cont'd)

## **240v power system**

These craft come with a 240v system as standard, tested and installed to the relevant RCD standards. This has 3 double sockets in brushed stainless steel and simply needs plugging into the shore power. 20A Sterling battery step-charger to ensure your batteries will charge effectively and 1800w Sterling inverter.

## **12v system**

3 x 110A/h Domestic batteries which are charged by a dedicated alternator. These are connected to a purpose-built distribution panel, which carries individual breakers for all of the appliances. The lighting is a combination of LED spots, spots and wall lights throughout the boat.

## **Gas system**

Fully installed and tested to the relevant standards with storage space for two 13kg propane cylinders either forward or aft depending upon design. All boats come with an independent gas safety certificate.

# External

## **Finishes**

All boats come beautifully coach painted in high gloss marine enamel over high performance primers and undercoats. The standard finish comprises one colour with a contrasting coachline but we are able to accommodate almost all personal preferences when it comes to specifying your chosen colour schemes, from additional colours for the side panels, roof and handrails to traditional decoration such as counter bands and bow panels. A non slip coating is applied to all relevant areas such as decks, roof and gunwhales. The lower hull is prepared and bitumen blacked and has four anodes fitted ready for use in fresh water. (If you intend to keep your boat in salt or brackish water please ask about suitable alternative protection).

The interior woodwork of your boat is finished in a high performance water based, low VOC, clear acrylic finish which is extremely hardwearing, has minimal impact on the natural colour of the timber and is kinder to the environment.

All soft furnishing fabrics are high quality, modern, upholstery weight materials designed specifically for seating and window dressings. There are hundreds of colours and designs to choose from.

Flooring options are chosen to be attractive, practical and hardwearing with a choice of carpeting, vinyls, laminates and solid hardwood. Available in a broad range of colours and designs and in any combination.

## **Windows**

Variety of windows fitted to both sides comprising 12" port holes and a mix of 18"/36"/42" sized windows.

# Internal

## Lining and wood type

Oak or Ash faced ply with matching hardwood trim can also be complemented with cream painted panels to the upper cabin interior walls and / or a cream painted tongue and groove match board ceiling, all with matching solid hardwood cappings and trim. To ensure both strength and stability, fitted furniture will be constructed from high quality moisture resistant veneered board, again with solid hardwood cappings.

## Galley

With a choice of designs depending upon your chosen model (please see layout drawings), the galley offers contemporary styling combined with mod cons and ample storage alike. Feature hardwood work surfaces are included as standard with 4-burner hob and a household size round stainless sink with monobloc tap. Convenient eye level stainless steel oven and grill, microwave and a 12v fridge with freezer box are all housed in a floor to ceiling matching unit (dependant on layout).

## Saloon

The saloon on both models is designed for freestanding furniture and includes built in TV unit with flat panel television, a radio / cd player, storage cupboards and a solid fuel stove on a tiled hearth. There is the option for either an L shaped or Pullman style dinette that will convert to an additional double bed.

## Bathroom

Clever design makes use of the space to feature a vanity unit with hand basin, resting on a hardwood worktop to match the galley. There is a Thetford C200 electric water flush cassette toilet (pump out option available). There is a corner shower which is fitted with a waterproof panelling system that provides a contemporary and watertight finish. All in all this is a room that wouldn't be out of place in a modern day apartment.

## Bedroom

The bedroom has been designed to create an environment of relaxation and both plenty of practical storage. There is a fixed double bed with drawers under and overhead cupboard with down lights. At the foot of the bed there is a Wardrobe unit.
