

# NARROWBOAT STAMFORD

Lying at Mercia Marina - 2016 - 62ft - Traditional Stern

THE NEW &  
USED BOAT  
Co

REVIEWED IN  
WATERWAYS WORLD  
July 16 Edition

Much has already been written about Stamford as it was featured in Waterways World 2016, the same year the boat also exhibited at the Crick Boat show, where it won much acclaim.

Jonathan Wilson along with the input from a very experienced owner combined to create a very traditional looking boat but with a very crisp, contemporary interior by the talented Phil Herrington of Stem to Stern. The extended semi-tug deck, rivet effect, pigeon box and dummy plate over what would have been the engine room all give the impression of a very traditional boat.

Inside the interior fit out is very light and crisp throughout, giving a real feeling of space & openness. The electrics and mechanicals are where the owner who has many years of experience in the boat building industry really took over with the intention of creating a very self-sufficient boat using the best materials possible. Call for more detail.

## SPECIAL NOTES

Large insulated bow locker with generator, bow prop, heater, water pump etc. Accessed through large hatch on front deck (see photo).

The quality of equipment and materials used coupled with the attention to detail are what make this boat an absolutely outstanding modern narrowboat.

Engine enclosed in easy to access sound insulated enclosure. Waterways World commented this is possibly the quietest boat with a dry exhaust we have tested.

The boat was reviewed on July 16 edition of Waterways World (copies available on request).

Viewing by appointment only.

# NARROWBOAT STAMFORD

PRICE £142,950

Walk-through bathroom with corian worktops and corian inset hand basin

A glimpse of just some of Stamford's high specification onboard electrical equipment.

Traditional Jasher style bow with lowered tug style deck.

Stamford, a very modern traditional narrowboat.

What look like engine room doors open to reveal double glazed with thermal break windows.

Lid on locker opens to reveal sound insulated man cave with Vetus 4kva raw water cooled generator.
